A. B. C. SINGLE LARGE-FLOWERING PETUNIAS

Introduced to the trade some five years ago by A. B. C., and has probably enjoyed the largest demand of any strain of Petunia ever offered to the florist grower. Continued repeat orders from year to year testify to the value of this unusually exceptional dwarf mixture.

When ordering, please mention which of above mixtures is desired.

Originator's (Eriksson's) Seed

Produced under glass by that eminent florist-grower, Mr. Ernst Eriksson, of Riverside, Illinois (originator of *Primula Malacoides Eriksoni*), this improved strain of hand-pollinated large-flowering dwarf Petunias is in our estimation the choicest and finest of this type available. It is excellent for Easter and spring pot plants, porch and window boxes, and for bedding. This strain is as profitable as it is beautiful.

New All-Double Petunia *"Brilliancy"*

In order to meet the demand for a brighter rose-colored Petunia than "World Beauty," Messrs. Sakata, who developed the true "All-Double" strain, and which has, we might say, proved somewhat of a bonanza to the trade, sends us this year a limited quantity of seed of their latest find in this family and having bloomed the past season a number of plants of "Brilliancy."

We concur fully in their estimate of having pro-

duced another new variety of the highest value to the florist grower and we suggest a nominal planting of same for the coming season. Because of the small amount of seed that is available this year, "Brilliancy" can only be supplied in packets.

SPRING - 1942 - EDITION

IN presenting to you our 1942 catalog, we have endeavored to place before you items of seed, bulbs and plants to take the place of varieties that formerly were imported from Europe, but which are prohibited now.

Petunias are one of our specialties, having introduced a large percentage of the finer varieties that are now on the market. We were one of the first to bring to the attention of the florist the All-Double Petunia, which is now accepted by the trade as the finest for pot culture.

Every year we have searched the world for new items. We have made tests with the large seed growers of California for the reproduction of many of the fine things that we are offering you, as we have been successful in growing in this country what was formerly imported from Europe.

Primroses . . . We are still able to get some of the finest strains from Europe as usual, likewise supplying you with the best greenhouse-grown American seed.

Stocks . . . One item that is very important for the florist. Two years ago we introduced, after making many tests, the new variety, "Gardenia," which is now accepted as the best and the most desirable of all varieties on the market for the florist to grow.

In our bulb offerings in this catalog you will find many new varieties that are now very low priced, as we have been able to produce them in larger quantities to bring the price within reach of all of our customers.

We take pleasure in wishing you a prosperous and happy New Year, and assure you of our appreciation for the confidence you have placed in us in supplying you with your seed, bulbs and plants.

Faithfully yours,

AMERICAN BULB COMPANY.

FLOWER SEED NOVELTIES FOR

Petunia "Glamour"

ANTIRRHINUM MAJUS GRANDIFLORA RUST- RESISTANT "REVEILLE"

Reveille is colored a deep luminous yellow, with the upper lip of each floret toning to a lighter lemon yellow. Its individual florets are unusually large and are tightly grouped on the spike. Stems of these florets will measure better than three inches deep and 8 to 10 inches long, carried on 22-inch spikes. It is strongly rust-resistant and heartily recommended for both florist and

home gardener. It is a "true to type" Snapdragon and one fit for your most discriminating trade.

Tr. Pkt.....50c 1/8 oz.....\$1.25

All-America Winner CLEOME "PINK QUEEN" (Awarded Silver Medal)

This beautiful Spider Plant grows recklessly from Maine to Florida and west to the Pacific. It is never out of bloom. A tall and attractive border plant, free from insects and disease, with huge heads of delightful and refreshing pink, without a trace of blue or magenta. The large flower bracts turn to white before falling, giving an appearance of a white collar with a pink cap. Reaches over 4 feet, well branched, airy foliage, blooming from June until frost. A grand flower.

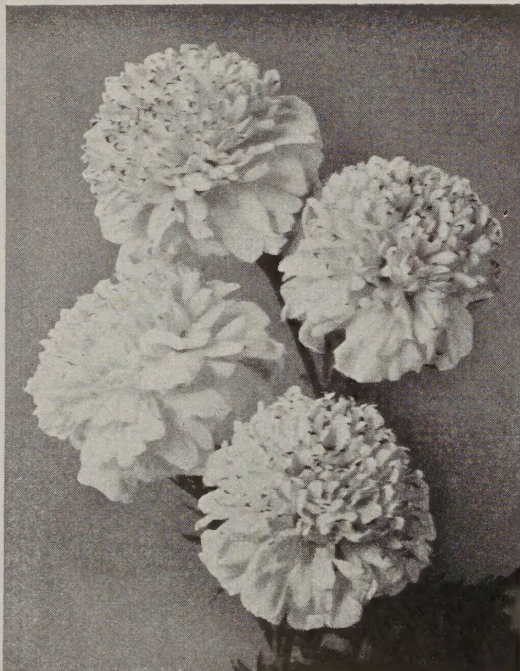

Tr. Pkt.....50c 1/4 oz.....\$1.00 Oz.....\$3.00

COSMOS DOUBLE PEERLESS TYPE "WHITE CLOUD"

White Cloud has the same mammoth Sensation type form of flower, and is extra early flowering. Flowers average between 4 and 5 inches in diameter. Plants grow about 38 inches tall and have a multitude of 15-inch stems for cutting. Color is a beautiful soft velvet white. Especially outstanding for florists.

Tr. Pkt.....50c 1/8 oz.....\$1.50

All-America Winner

Marigold "Butterball"

COSMOS "YELLOW KLONDYKE"

(Awarded
Silver Medal)

Similar to the original Orange Flare, Gold Medal winner of 1935, except its color is a very rich and compelling butter yellow, described as golden yellow by some judges. Even more striking in color, 3 to 4 feet tall, and an excellent garden flower. Free blooming on long, wiry stems, airy serrated foliage, slightly later and taller than present strain of Early Orange Flare. Bound to be popular.

Tr. Pkt.....50c
1/4 oz.....\$1.25
Oz.....\$4.00

All-America Winner IPOMOEA "PEARLY GATES" (Awarded Silver Medal)

A sport from and seemingly identical in growth, foliage and bloom, except white in color, with Clark's Early Heavenly Blue Morning Glory. A grand companion for its most popular counterpart. A big, satiny white, with a creamy shading in the throat, gives this a beautiful appearance. Plant with Heavenly Blue and Crimson Rambler or Scarlet O'Hara for red, white and blue effect. Reaches 12 feet, with luxurious foliage.

Tr. Pkt.....50c 1/4 oz.....\$1.25 Oz.....\$4.00

LARKSPUR EMPRESS TYPE "ROSEBUD"

The bushy dwarf plants require no stakes. Have deep salmon pink double flowers. It is base branching and produces long stem of florets for cutting. Height 33 to 36 inches.

Tr. Pkt.....40c 1/4 oz.....\$1.00 Oz.....\$3.50

LARKSPUR GIANT IMPERIAL "LILAC KING"

A welcome addition to the King type of Larkspur is Lilac King. It has a fine, rich, clear lilac shade, a color in great demand by the florist trade. The individual florets are fully double, 2 to 2 1/2 inches in diameter, with broad, wavy edged petals, closely spaced on 24 to 28 inch straight spikes.

Tr. Pkt.....50c Oz.....\$2.50

All-America Winner MARIGOLD DWARF CHRYSANTHEMUM FLOWERED "GOLDEN BEDDER" (Awarded Bronze Medal)

A very early, and perhaps the earliest of all, variety, and of uniform habit. Plants form symmetrical mounds, covered with golden orange flowers. This color seems distinct. A row of outer guard petals is surmounted by a fully double crest of Dixie Sunshine type petals or miniature flowers. Foliage is sparse and light green, passing yellowish as plants go out of bloom. A second planting can be made for fall flowers. Long stems allow nice flowers for cutting. Chief value is in extra earliness, making its crop before other varieties start.

Tr. Pkt.....50c 1/4 oz.....\$1.50 Oz.....\$4.50

All-America Winner MARIGOLD DWARF FRENCH DOUBLE "BUTTERBALL" (Awarded Bronze Medal)

Most attractive, very compact, scabious-flowered, canary yellow. Only 6 to 10 inches tall, uniform, very early and continuous flowering. Bright and luminous bedding or edging variety which you can't help but like. Rich, dense foliage, well covered with small 1 1/4-inch blooms. This makes a nice pot plant and should also be a good commercial variety.

Tr. Pkt.....35c 1/4 oz.....75c Oz.....\$2.50

All-America Winner MARIGOLD DWARF FRENCH DOUBLE "MELODY" (Awarded Bronze Medal)

Growing 12 to 15 inches high, and literally covered with golden yellow, Harmony type flowers, this is recommended to displace Dwarf Scabious Flowered, Golden Harmony. Very uniform in height, habit and color; rather early, and a long, steady bloomer, except in the most northern locations. Equally valuable for commercial use.

Tr. Pkt.....30c 1/4 oz.....75c Oz.....\$2.50

1942 and "All-America" Selections

All-America Winner

MARIGOLD MISSION GIANT "YELLOWSTONE" (Awarded Honorable Mention)

Bright, rich, clear yellow counterpart to Goldsmith, 1941 Bronze Medal winner, with large 2½-inch flowers, on luxurious, large plants. Late blooming and lasting until frosts. Flowers are of double, incurved, Chrysanthemum-like form, and very attractive. Rather late for the most northern, short season, locations. Uniformly 3 to 5 feet tall.

Tr. Pkt.....40c ¼ oz.....\$1.00 Oz.....\$3.50

All-America Winner

NIEREMBERGIA "PURPLE ROBE" (Awarded Bronze Medal)

Similar to Nierembergia Hippomanica, except several shades deeper blue or violet-blue in color, from which it was selected. This is a half hardy perennial, treated as an annual, blooming in about 15 weeks from sowing. It prefers full sun, sandy loam, and makes a grand border and edging subject. It stays in bloom over a long period and with a colorful blanket of bloom. Very dwarf, about 6 inches tall, cushion-like plant, surmounted with flowers the color of Silver Blue Petunia.

Tr. Pkt.....75c 1/32 oz.....\$2.00 1/16 oz.....\$3.50

PETUNIA GIANTS OF CALIFORNIA "GLAMOUR"

A lovely selection out of Bodger's Supreme Florists Strain, which made such a glorious impression on the seedsmen at Lompoc, following the A. S. T. A. convention in San Francisco, two years ago. It has a large salmon-rose flower with brown veining on white in the throat; a free and continuous bloomer. This is an excellent color under artificial light and outdoors. There is a little variation in color shades and though mostly with wavy, fringed petals, some come plain edged and smaller in size than the 4 to 5 inches. Height is usually 15 to 18 inches.

Tr. Pkt.75c

All-America Winner

PHLOX GIGANTEA "RED GLORY" (Awarded Honorable Mention)

Gigantea Art Shades won a Silver Medal in 1935. Salmon Glory, the first separate color in this new giant-flowered type, won a Silver Medal in 1939. Then, perhaps with a bit of the glamour removed, Rosy Morn, with richer color, won a Bronze Medal in 1941. Here is the richest bright red, with contrasting white eye, of this same type, for 1942, and no less valuable than the salmon-pink and rose varieties. Its color is the same as Scarlet Flax; a free, continuous bloomer, tall, lightly foliated, uniform and true.

Tr. Pkt.....50c 1/8 oz.....\$1.25 1/4 oz.....\$2.25 Oz.....\$8.00

All-America Winner

RUDBECKIA "STARLIGHT" (Awarded Honorable Mention)

This large-flowered, semi-double selection out of Kelvedon Star, is certainly a free bloomer. Its doubleness varies from fully double to single, mostly with about three rows of petals. Coloring is from primrose yellow to mahogany and bicolors, with mahogany centers. Unique for cutting and arrangements, with nice long stems. About 3 ft. tall, branching plants.

Tr. Pkt.....50c 1/16 oz.....\$1.25 1/8 oz.....\$2.00

EARLY SWEET PEA "RHAPSODY"

Rhapsody has a deep lavender base color that is enhanced and enlivened by dainty rose-pink tints. Each flower has a broad 2½ inch standard, similar in form to Princess blue variety. It is several shades deeper than Harmony and in addition has orchid or Cattleya tones blended with the lavender.

1/2 oz.....\$1.50 Oz.....\$2.50

ZINNIA CACTUS FLOWERED GIANTS MIXED

The petals of Cactus Flowered Giants are quilled, curled and pointed, with no center showing. Flowers average between 4 and 4½ inches across. Range of colors is red, yellow, lavender, orange, pink, bronze, rose, buff and salmon.

Tr. Pkt.....40c
1/4 oz.....\$1.75

Ipomoea "Pearly Gates"

All-America Winner

ZINNIA DAHLIA FLOWERED "ROYAL PURPLE"

(Awarded Honorable Mention)

A deep, rich royal purple color without blue toning. Its uniformity in plant habit, large flowers, color and height, shows good breeding. Purple flowers are not usually in popular demand but this should take well with the public. Flowers are usually 4 inches across, fully double, and plants grow about 3 feet high.

Tr. Pkt.....35c 1/4 oz.....65c Oz.....\$2.00

ZINNIA STRIATA "OLD GLORY"

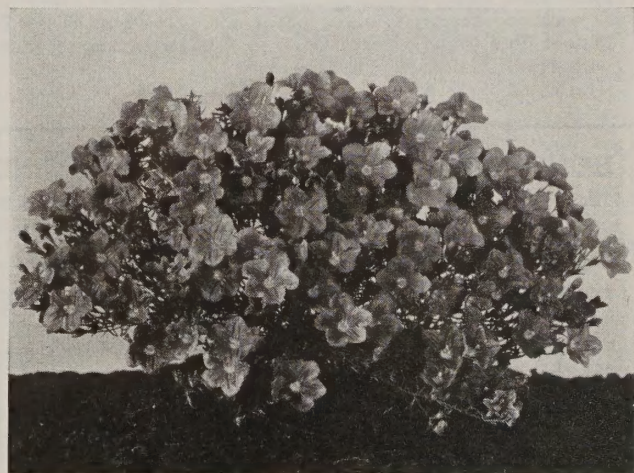

Gaily striped red and white, this colorful newcomer is most effective in flower arrangements. The flowers are medium sized, 2½ to 3 inches, carried on plants which attain the height of approximately 2½ feet. Very early and free blooming.

Tr. Pkt.....40c 1/4 oz.....85c Oz.....\$2.50

ZINNIA STRIATA "THE CLOWN"

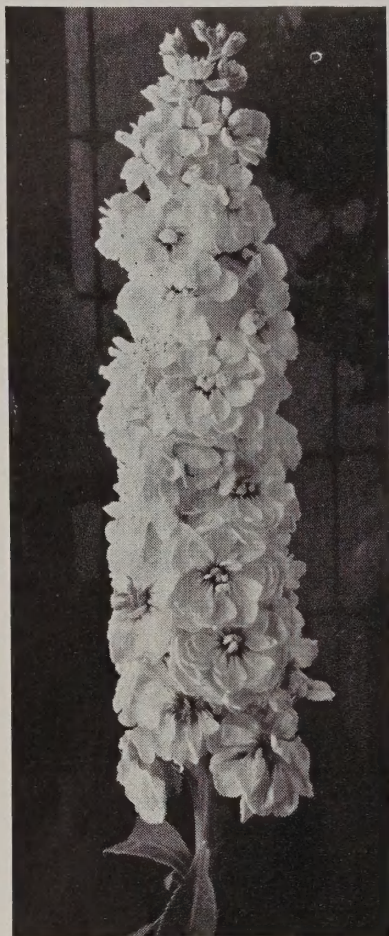

The Clown is an amusing new Zinnia cheerily striped scarlet and gold, a new-found jewel for the cutting garden. The 2½ to 3 inch medium sized blooms are ideally suited for home and garden use. The plants are freely branched, 2½ inches tall, bloom profusely and like other Zinnias, the more flowers cut, the more will be produced.

A Specialty with us.

It is well known that in order to produce THE HIGHEST TYPE OF FLOWER SEEDS an unusual amount of care and attention is required while in the state of production, therefore seeds should only be purchased on a QUALITY BASIS.

In line with the usual A. B. C. policy, we shall continue our wholehearted efforts to the end of supplying FLOWER SEEDS OF "SUPREME" QUALITY for the FLORIST GROWER and our prices will be found to be reasonable and consistent with the aforementioned "THE KIND YOU NEED FOR PROFITABLE RESULTS."

We wish to call your special attention to "ALL-AMERICA" Flower Seed Selections. Because of the extensive advertising these valuable new introductions will receive throughout the U. S. A. during the coming year, we believe growers will find it profitable to provide small plants of same for merchandising to the public for garden planting. Such plants for sale in the Spring season should provide a neat profit for you.

Snapdragon America (Hodaly's)

First Prize Winner
Chicago Flower Show 1941

A brilliant rose-pink, with orange lip, blending into pure lemon; one of the most remarkable color combinations seen in Snapdragons. The flower heads are sixteen to twenty-five inches long, carrying well set, large florets; medium foliage. A real winter bloomer, with uniform flowering period. We personally feel very confident in recommending this new introduction; it has all the qualifications of a good commercial variety.

PRINCESS TYPE (New)

The Princess Type Aster provides a needed, new form for the cut flower grower. The blooms have a fully crested center surrounded by several rows of strong guard petals. They are fine keepers and good shippers. Flowers are from 3" to 3½" and the class is early flowering, coming in mid-August. They are practically 100% wilt-resistant.

Princess Anne. Peach blossom shade, opening delicate pink and turning rose-pink.

Princess Bonnie. A very beautiful soft salmon-rose shade with the center rich gold while opening. We predict a great future for Princess Bonnie as a commercial cutting variety.

Princess Marsha. A strong, vibrant cinnabar scarlet, boldly contrasted with the rich gold center of the young flower.

Bodger's Famous "Regular" Strains

Aster "Improved Giants of California"

SPECIAL NOTE

In soil that is clean, and rot is not to be considered, our "Regular" Strains of California Asters, listed below, will be found generally satisfactory. However, if in doubt, plant "Bodger's Wilt-Resistant" Strains. The small difference in cost of seed is of little moment compared to crop results.

IMPROVED GIANTS OF CALIFORNIA,
(Curled and Interlaced)

(Also known on the Chicago Cut Flower Market as "Chicago Giant Beauty.")

This new Aster is somewhat of the Crego and Beauty type, but is practically non-lateral, producing flowers of immense size without disbudding and of wonderful substance on strong, stiff stems 20 to 24 inches long, acclaimed by wholesale and retail florists as the ideal of cut flower Asters.

CALIFORNIA GIANT SUNSHINE

Alpenglow. Color charting this Aster in Ridgway, we have the following: Guard petals, Rosolane purple; quilled petals, pale rose-purple; center, Premuline yellow.

Blue Moon. The guard petals are the same beautiful light blue color so much admired in Aster, California Giant Light Blue. The quilled petals are several shades lighter, while the center is an amber yellow.

Moonbeam. The blooms of this Aster are snow white, with a small center of soft orange.

Rainbow. A bright rose-pink Aster of a true California Giant habit. The stems are long, strong and non-lateral. The guard and quilled petals are the same color, a delightful shade of bright rose-pink, with a center of soft orange.

Stratosphere. A rich dark blue, which might be compared in color to Light Purple in the California Giants. The guard petals are pansy violet and the quilled petals are lavender, with the center a charming shade of orange. Price, each of above:

MISCELLANEOUS VARIETIES

Harmony Mixture (New). A fine cutflower variety similar in type to Giants of California. Colors include lovely shades of light and deep blue, flesh, peach blossom, silvery rose, purple, and white. Flowers have full-double quilled centers. Plants are 2 to 2½ feet tall, bearing blooms 4 to 4½ inches across.

Tr. Pkt.....50c ¼ oz.....90c Oz.....\$3.50

Rosalie. A new shade in the American branching type of Aster. The handsome fully double flowers are 4 inches in diameter. The color is a deep rose-pink, bright and attractive, and the flowers are borne on long, clean stems. What is really outstanding about this new Aster is its ability to produce flowers that are 100% double throughout the season, and at no time are the centers exposed. "Rosalie" is certain to become very popular for florists as well as for home gardens. Tr. Pkt.....35c Oz.....\$2.50

GIANT MAMMOTH PEONY FLOWERED

Mariner. One of the finest florist type Asters, especially where flowers are to be sent any distance. They are admirably adapted to shipping as the compactly placed rather heavy petals can stand handling much better than more fragile types. The plants are 2½ to 3 ft. tall, with long, stout non-lateral stems bearing large flowers. The color is a rich medium or navy blue with light green stems. Although not a wilt-resistant, Mariner is well worth your consideration.

Tr. Pkt.....30c ¼ oz.....65c Oz.....\$2.00

SUPER GIANTS.

El Monte. A few seasons ago we introduced the sensational new Super Giant Aster Los Angeles, a delicate shell pink color. Extremely popular in the cooler climes, a more rugged color was desired in the warmer lands. This wish is met completely in our new companion Super Giant, El Monte, the only really large flowered crimson Aster. Deep glowing crimson, composed of abundant quantities of daintily interlaced plume-like petals, the flowers are extremely large and fluffy, borne on heavy non-lateral, basal branched stems. It is very early blooming, coming in before the California Giant varieties, and remaining in flower over a long period. Although not wilt-resistant, we highly recommend El Monte to you. Plant El Monte for your earliest Giant Aster.

Tr. Pkt.....35c ¼ oz.....75c Oz.....\$2.50

Los Angeles. (Award of Merit, All-America Selections.) Los Angeles. Bodger's introduction of a few seasons ago, is still one of the most popular and best selling Asters on the market. The first introduction in the modern Super Giant class, the flowers are fully double, 6 to 8 inches across, graceful and delicately interlaced. The long, stiff stems are basal branching and strictly non-lateral, bearing the large flowers smartly upright. Don't overlook this fine Aster.

SEMPERFLORENS

For greenhouse pot plants and summer bedding. While Begonias are easily grown from cuttings our experience has proved that plants grown from seed are far superior. As a bedding plant there is nothing more satisfactory; also excellent as a pot plant and for a "filler" with other plants.

"White Lady." Substantial, beautiful pure white flowers, almost as large as those of our "Masterpiece," to which it makes an excellent companion. Tr. Pkt. \$1.25 3 Tr. Pkts. \$3.00

Masterpiece. A lovely clear rose-pink Begonia, and the most outstanding in this color class. The large-sized blooms are produced so abundantly that the foliage is really overshadowed. A large bed of "Masterpiece" observed on a large estate near Chicago this past season was a sight to behold. For pot plants as well as for bedding, you have something if you have this exceptional new Begonia. Tr. Pkt. \$1.25 3 Tr. Pkts. \$3.00

Eriksson's New Scandinavia. A new, continuous flowering, Semperflorens Begonia with a wonderful branching habit. Sow seeds in January for Memorial Day; in May or later, for winter; October or November, for Mother's Day purpose.

UMBELLATA TYPE

If you have grown annual Candytuft before and found it a poor seller, it is more likely that you had too much of the white variety. Try in its place a few of the colored varieties, such as Pink, Rose, Carmine, Lavender and Crimson and be convinced that this annual is of much use in the florist's establishment in the spring. It will take about five months to bring them into flower indoors. Plans may be made accordingly, taking into consideration the period cut flowers will be of most use to the individual florist. A good time for one planting is soon after the winter holidays, as space becomes available. Some growers sow the seed singly, planting out later at the distance of a foot apart. Valuable for cutting.

CINERARIAS

MULTIFLORA MAXIMA (Eriksson's Private Stock)

We proudly say this is an A. B. C. introduction, because in the last few years it has gained the confidence of some of the largest pot plant growers as one of the leading commercial types. Its range of colors is "tops," well including every desirable shade in pinks, reds, blues, delicate pastel tints to solid bright shades and beautiful-eyed types. Mr. Eriksson has for the past ten years personally selected the finest plants for good branching habit, small leaves and medium dwarf height. The size of flower is also a good medium size. In our opinion it is one of the very finest cinerarias on the market today.
Tr. Pkt. (500 Seeds).....\$1.00

CREMER'S PRIZE

Produces somewhat smaller blooms than does "Eriksson's" with plants of good height and is of such high sale value that growers, in our opinion, will not go amiss in planting liberally of both. The originator is constantly improving the strain.

CONVOLVULUS (Morning Glory)

IMPERIAL-EXTRA LARGE

These mammoth flowering imperial Morning Glories often measure more than 6 inches across and are entirely distinct from the Morning Glory generally known. In fact, they variably create somewhat of a sensation when in bloom. For pot or window box culture, if the runners are pinched two or three times the plant will form a dwarf and compact shape, bearing innumerable gigantic flowers. Florists who cater to the public in the way of small plants for home garden show will, we believe, find the above profitable to offer from 2 1/4" pots.

HOLLYHOCK (Annual)

Indian Spring. (Awarded Silver Medal, All-America Council.) Produces flowers of attractive bright rose and rosy carmine shades, of a size similar to the Single Perennial Hollyhock; however, seed sown in February will bloom freely in early August. "Indian Spring" attains a height of six feet or more, with flowering branches produced freely from about a foot from the soil. "Indian Spring" produces a compact pyramidal plant that is worthy of high recommendation.

Ipomoea (Morning Glory) "Scarlett O'Hara"

IPOMOEA (Moonflower, Etc.)

Clark's Early-Flowering Heavenly Blue. This strain is well known and widely used throughout the United States. It is early-flowering and makes a sparse growth of foliage. When growing Ipomoeas, care should be taken to plant them in a dry, sandy location, and fertilizer should never be applied. One of the most admired flowering vines at the Chicago Century of Progress. This climber made a beautiful showing on the back wall of the Horticultural Building. A color of pure, unrivalled beauty. Tr. Pkt.....**15c** Oz.....**.65c** ¼ lb.....**\$1.75**

"PEARLY GATES"

(Awarded Silver Medal in All-America Selections)

A sport from, and seemingly identical in growth, foliage and bloom, except white in color, with Clark's Early Heavenly Blue Morning Glory. A grand companion for its most popular counterpart. A big, satiny white with a creamy shading in the throat, gives this a beautiful appearance. Plant with Heavenly Blue and Crimson Rambler or Scarlet O'Hara for red, white and blue effect. Reaches 12 feet, with luxurious foliage, wherever Morning Glories will grow.

"SCARLET O'HARA"

(Awarded Gold Medal, All-America Selections, 1939.)

"Scarlet O'Hara" is an entirely new color in a Morning Glory, a rich dark wine red, or deep rosy crimson. Few introductions in recent years have caused so much interest prior to the introduction and now that "Scarlet" is with us, we can say it warrants all that was expected earlier. Though the flowers are not as large as "Heavenly Blue," they are of good size, about 4 inches in diameter, and freely produced on fast-growing vines which start blooming within 65 days after seed is sown. The dark green foliage does not make a heavy growth.

NOTE! In order to produce freedom of bloom, sow seed in pots or tin cans and insert in soil in the open.

KALANCHOE

Tom Thumb. This is a dwarf variation of Kalanchoe Blossfeldiana, having the same color. The general habit, however, is dwarf with very short flowering stems that form just beyond the foliage and the flowers, instead of merely forming above the foliage, actually envelop the entire plant, starting at its base.

Blossfeldiana (Globulifera Coccinea). A succulent plant that is very easy of cultivation. The flowers are similar to Bouvardia in form, and in color they are very bright scarlet. Tr. Pkt...**.60c** 3 Tr. Pkts...**\$1.35**

CULTURE FOR KALANCHOE. Propagated easily from seed. Sow in January and prick off when large enough. Place two plants in a pot; this will increase sales. Plants pinched in June and July will not flower as early as those not pinched. Plants should be made up similar to Poinsettias. Shade from August 16 to October 15, will produce plants for Christmas if grown in a 60-65 degree house. No specific recommendations as to soil or fertilizer. Time of later bloom controlled by temperature.

WINTER FLOWERING

Lieb's Sensational Cut Flower Novelty. The Originator's Improved Strain now obtainable from seed. New winter cut flower, deep brown with golden yellow crested center. Flowers five weeks after planting, continuing five months. Flowers are of wonderful keeping quality and have a distinctly sweet odor.

The best paying bench space in your greenhouse.

For best results seed should be sown from July up to December. Plant in any house that can be kept free from frost. Fine to follow Mums. Plant 10 by 10 inches and pinch back once. No insect pests.

CARNATION FLOWERED

Gigantea Sunset Giants is a Novelty from California; it is said to have the largest known flowers in the "Marigold" group, averaging 5 inches and some flowers attaining a size of 7 1/2 inches across. Instead of the usual "Marigold" odor these flowers have a definitely sweet fragrance. This is a mixture ranging from deep orange through golden orange, deep golden yellow, light yellow, lemon yellow, and a delightful new shade of primrose. The strain comes from 60 to 65 per cent double. The plants are normally 3 1/2 to 4 feet high, but under favorable conditions have been known to grow as much as 7 feet high. Excellent for cutting.

Tr. Pkt.....20c 1/2 oz.....75c Oz.....\$1.25

Gigantea Orange Sunset. The color is a deep, rich, lively orange, one of the most admired shades found in the Sunset Giants Mixture. The plants are strong growing, upright branching in habit, usually about 3 feet tall, producing a heavy growth of foliage, and with 6 to 8 heavy branches, each bearing 3 to 6 large flowers. Blooming commences about the first of August in most sections of the country, in late June in the southern states, and flowers can be depended on well before frost in any latitude. Orange Sunset has been tested and found to be a fine forcer in the greenhouse, and will come over 65 per cent double.

Tr. Pkt.....15c 1/2 oz.....35c 1/4 oz.....50c Oz.....\$1.50

CARNATION FLOWERED (Continued)

Golden Eagle. Very similar in habit, flower size and type to the well known Guinea Gold. The color, however, is a rich golden yellow, midway between Yellow Supreme and Guinea Gold. If you have grown these two, the value of this new color, especially for outdoor cutting, can be visualized and appreciated. Tr. Pkt.....15c 1/2 oz.....40c Oz.....75c

Burpee Gold Improved. Odorless foliage. Here is truly a Marigold with a host of things to commend it—even, rich, deep orange color, large flowers, 3 1/2 inches across, beautiful Carnation-like form, attractive habit, uniformity of color and blooming time, full doubleness with no singles, earliness, and above all absolute freedom from the usual Marigold odor. Flowers somewhat resemble Guinea Gold, being made up of loosely arranged rays or petals which are shallowly fluted.

DWARF DOUBLE FRENCH MONARCH STRAIN

Golden Ball. Light golden orange and nearly 100 per cent double. Easily the finest in this color. 12 to 15 in.

Tr. Pkt.....15c Oz.....60c

Mixture. A bright mixture of mahogany, orange and yellow. Around 75 to 80% full-double, nicely formed flowers. Flowers of this strain are more attractive than the Dwarf French mixed above, but they are also about 2 weeks later flowering and in sowing this should be remembered. 14 to 16 in.

Tr. Pkt.....15c Oz.....60c ¼ lb.....\$2.00

DWARF FRENCH SINGLE

Fire Cross. Single dwarf light orange, resembles Legion of Honor except that the yellow on outer edge of petals is a deeper golden shade. Also we find Fire Cross some earlier flowering and more compact. A valuable outdoor variety. 12 to 14 in.

Tr. Pkt.....15c Oz.....50c

Legion of Honor. A well known dwarf single. The lemon-yellow in this variety contrasts brightly with the mahogany center. Both the above two dwarf singles are valuable for early flowering in small pots.

Tr. Pkt.....15c Oz.....50c

TALL FRENCH SINGLE

Ferdinand. (New.) (Harmony type.) Golden yellow with single row of broad mahogany-red guard petals. Flowers are 1½ to 1¾ inches in diameter. Tall growing, 20 to 24 inches, with upright semi-compact habit. No strong Marigold odor.

AFRICAN LITTLE GIANTS

Mixed. Throws blooms varying in form from the informal Carnation type to the perfect *Fistulosa* globe. The plants are very closely compact and the stems short. Its foliage is a beautiful dark bluish green. Although Little Giants range in height from 10 to 15 inches, a fraction percentage of taller plants will show up. However, these are easily detected at the transplanting stage as they all have light colored foliage—Little Giants being a deep bluish green. Little Giants is strongly recommended for bedding and pot plants, especially the latter—as it will bloom a head of twenty-five flowers all at the same time. Color ranges from a yellow to a very bright orange, with many shades in between. Tr. Pkt....25c ¼ oz....50c Oz....\$1.50

Marigold "Tall African All Double"

MARIGOLDS (Continued)

MISSION GIANTS

A new class of Marigolds of medium height with giant Chrysanthemum blooms. Plants grow about 18 inches high with a good amount of vigor, having a base branching habit producing 8 to 12 stems of excellent cutting length. An early blooming class about 2 weeks earlier than the African type. Blooms 4 to 5 inches in diameter forming an almost perfect ball. They remind one of an incurved type of Chrysanthemum. A real addition to the Marigold family.

BURPEE RED AND GOLD HYBRIDS

A cross between African and French Marigolds. These are the earliest of all Marigolds. Will flower in less than eight weeks from seed. The color varies with the season and the growth of the plants. At times it becomes pure yellow and at other times a bright rich mahogany red. The flowers are nearly three times the size of the largest French Double. They grow 1 1/2 ft. tall, 2 ft. wide and are literally covered with flowers at all times. Tr. Pkt...35c 1/4 oz...\$1.25 Oz...\$4.00

PANSIES

A. B. C. "DE LUXE" MIXTURE

This mixture is the result of many years' selection from the world's finest strains. The seed is hand-picked from personally selected plants, which justifies us to call this unquestionably the world's finest strain of fancy Pansies. We highly recommend it for cut flowers as well as spring plant sales. Growers tell us that A. B. C. "De Luxe" Pansy plants easily command a premium over stock produced from other so-called fancy mixtures. This superb strain of Pansies is of largest size, richest and most varied colors, and contains several shades of beautiful reds. You will make no mistake confining your Pansy cultures to this outstanding mixture.

DON'S GIANT WINTER-FLOWERING

Mixture. One of the most important horticultural introductions of recent years. Plants grow 2½ to 3½ feet high, with six to eight strong upright stems bearing numerous good sized blooms on flower stems 10 to 12 inches long.

Seed should be sown under glass, and the plants benched in the greenhouse. Set the plants 12 inches apart in the bench and support in the same manner as Carnations. They may also be grown in 6-inch pots sunk in the bench if desired.

The color range is excellent, and if the blooms are kept cut as they mature the flowering period will continue from December well on into the spring.

"WORLD BEAUTY"

Produces (from seed) practically 100% large double fringed flowers of the most beautiful rosy carmine color, wonderfully free blooming plants of the dwarf, compact growth which makes this grand new sort particularly desirable for pot plants as well as bedding. "World Beauty" has really created a sensation wherever shown. A few plants in bloom for demonstration to the public early in the season will undoubtedly result in an active and most profitable demand for this new favorite.

For Easter and Mother's Day, "World Beauty" has proved to be an ideal pot plant and a worthwhile profit provider. We introduced "World Beauty" to the trade and are again securing our seed supply from the originator, thereby insuring our customers the true variety. Sow seed early and follow with successive plantings up to March 1st next. We say by all means if you culture Petunias, do not leave "World Beauty" off your list. It is unquestionably the "last word" in Double Petunias.

Cultural Hints for "Fancy" Types of Petunias

There is a great difference in raising ordinary Petunias from seed and those of a high-bred strain such as "World Beauty," "De Luxe," "Portland," etc., varieties. The former kind will almost come like weeds with little or no attention, but an altogether different story must be told about the so-called fancy types. Their germination is very much slower and precarious.

Great care is imperative in watering and in choosing a rich but porous soil. Temperature may vary between 60 and 70 degrees, and seed pans or flats ought to be near the glass in bright light as soon as germination has taken place. Do not let them suffer for lack of water, but the slightest excess of moisture may cause sudden damping off, especially during the early winter months, when houses are but little ventilated and the days are short. Poor soil means certain failure in Petunia culture at all times. Sterilize soil with "formaldehyde" or steam, this will have killed all weed seeds, worms and fungi contained in the soil.

Beware of ants, snails, and sawbugs in Petunia seed flats. Put the flats on shelves out of their reach, or cover them nights with screen door wire netting. A night inspection with flashlight and a pair of tweezers is very effective in eradicating these costly pests from a house if repeated several times.

Transplant as soon as large enough to handle into flats, and bear in mind that those seedling plants growing most vigorously are the ones least desirable, while the weak-

lings in the lot are the real darlings that need your utmost care and attention and will reward you for it with the most charming flowers ever seen. The culls are invariably the first to bloom and the grower not familiar with the above-mentioned Petunias will pass unfavorable judgment right there and then instead of awaiting the blooming period of the slower but choicest types. The experienced grower can and will often discard the culls when the young plants are ready to pot into two-inch in order to save space for the choicest only if bench space has to be economized.

To let the young plants become potbound may produce early flowering but will stunt the plants in such a manner that they never will attain their finest size. A pinching back of the leading shoot before blooming will cause free branching and produce fine potted or exhibition plants if kept growing on for specimen display. Liberal use of fertilizer in the soil is beneficial, especially when shifting into larger pots. Light, airy houses are best to start Petunias in, but when they reach the flowering stage it is preferable to break the strongest sunshine by a light trace of shading, very light, however, or it will produce a spindly plant.

WATERING—That is an art when well understood, and in raising Petunias is of greatest influence. It is particularly important not to over water, especially in early spring and during cloudy weather, also when the young plants have just been potted up. When plants have attained flowering size avoid as much as possible wetting the foliage or flowers. In growing Petunias for potted plants, soil should be made very rich and doses of liquid manure will improve them when they are becoming potbound.

Single, Large-Flowered (Fringed and Ruffled)
Originator Strains—Seed from Hand-Pollinated Plants

Free flowering strong upright growths. Now very popular with the trade. Especially "Elk's Pride," which is the most outstanding of all purple varieties.

All flowers are hand pollinated and the seed carefully gathered by hand when ripe, not before, so that every seed has full germinating power. Colors run true almost without exception, but nature still seems to insist upon a small percentage of reverts to small flowers. Infinite care and time seem unable to eliminate this natural trait in Petunias.

WORTHY OF NOTE!

"THE FUTURE CROP LIES HIDDEN IN ITS SEED" is a very true old saying. Best seeds give largest profits; every expert grower is convinced of this. Initial buying cost may be a trifle higher but the biggest item, "cost of production," remains the same in the case of less reliable seed but final results are generally far outstanding in favor of the best class of seed.

"BETSY ROSS"

The New Miniature Ruffled Petunia

This color combination of red and white blooms with golden and dark red throats gives the individual plant, as well as a row of plants, a decidedly gay effect, particularly since the plants are so uniform and compact and so completely covered with ruffled blooms. In addition to being unsurpassed for bedding purposes, this new Petunia, due to its fine habit and free-flowering quality, is sure to become very popular as a pot plant.

PRIMULA

MALACOIDES "Improved Erikssoni"

ERIKSSON'S OUTSTANDING NEW VARIETIES

Glory of Riverside (Improved). True rose-pink, a strong grower and without a doubt the most valuable variety for all purposes. A real pot plant, especially for 6 or 7 inch pot production, here we suggest placing three plants to the pot.

Eriksson's New Giant. Color resembles closely Glory of Riverside. Very robust habit, with flower size approximately 1½ inches. It is a late bloomer, thereby assuring the florist-grower a longer Primula season.

Brilliancy (Eriksson's Deep Red). The flower opens lavender but changes to a brilliant red in one or two days in a sunny greenhouse. A very attractive and unusual combination, with top flowers showing lavender and the rest a brilliant red.

Eriksson's Pure White (Improved). A real improvement in a pure white Malacoides. Flowers profusely on numerous stems, making a good sized plant. Germination of seed also greatly improved. The best white now available.

Lilac Beauty. The color is a pure soft lilac, absolutely fixed. This is another fine color for making up artistic combinations.

Peach Blossom. Color a real deep peach blossom pink. It has a more compact habit than "Appleblossom," and it is also an excellent keeper.

MISCELLANEOUS VARIETIES

CHINESE GIANT

Single Dazzler. From Hurst & Son, seed merchants and growers of London, England, comes a "really startling novelty in flower seeds." It is a Chinese Primrose (*Primula Sinensis Fimbriata*) which the firm has named Dazzler in recognition of its striking and unusual color; "orange red," as seen in the setting sun, is suggested as the only term that accurately describes it. It is claimed that a well-grown specimen will carry well over 20, flowers open at one time. Tr. Pkt.....50c

NON-BRANCHING (*Double Excelsior*)

A. B. C. SUPERIOR COLUMN STRAIN

This new type produces one enormous spike 2 to 3 feet in height and is especially adapted for greenhouse culture, as the plants can be grown close together. We have discontinued listing the other separate colors in this type, due to its being practically impossible to obtain seed that will prove satisfactory and give a high percentage of doubles. Those listed are, in the opinion of most florist growers, the only reliable colors to grow.

BRANCHING TYPE

GIANTS OF CALIFORNIA

"The World's Best Double"

This magnificent new group is so marked in improvement that we believe they will head the list in florists' forcing Stocks in the very near future. Giants of California are very early flowering, with a high percentage of double mammoth flowers, and they have the branching habit of the Bismarck. If planted close, they will attain the height of 2½ to 3 feet. We feel this strain justifies our highest recommendation.

STOCKS (Continued)

IMPROVED BISMARCKS

A good proportion of a retail grower's Stocks should consist of this class. Though shorter stemmed, they are more freely produced than the non-branching. The branching kind can be planted close and grown single stemmed. Planted this way they won't branch except about the top and from there the branches should be removed.

A good suggestion with the branching kind is to space them 6 x 6 inches. When up about 8 inches, top back about one-third. Stars (*) indicate preferred varieties.

SPRING FLOWERING

A New Race of Sweet Peas for Greenhouse Culture

Perform outstandingly well in the spring months, giving excellent flowers on long stems when the regular early-flowering types had given out. The spring-flowering type also gives a much heavier crop of flowers than the standard early-flowering type. Seeds of the spring-flowering type should not be sown before September or October in the greenhouse for flowering during March, April and early May.

VENOSA

Heliotrope Blue. Tr. Pkt.....**25c** ¼ oz.....**40c** Oz.....**\$1.50**

Lilacina. Sow Early. Known in the catalogues as a perennial, is one of the most useful "blue" flowers one can grow. It is excellent as a cut-flower. In color, the flowers are delicate lavender-blue. One of this Verbena's qualities is its drought resistance. It will endure the most trying of seasons. The compact and bushy habit of the plant is inviting and it grows from 12 to 18 inches in height. Those who grow it will be well repaid with its beauty and attractiveness as a border plant. Also very desirable for cutting.

This Verbena must be treated as an annual. If possible, sow the seeds under glass in early Spring. The plants will flower in four months' time, continuing to bloom until frost. It is a strong grower, perfectly hardy and very free flowering, being literally covered with flowers throughout the season.

SPECIAL NOTE!

At the 1935 Wisley Trials in England, Waller-Franklin Seed Co., of Guadalupe, Calif., and from whom we obtain supplies of seed, obtained awards for Verbenas, Salmon-Pink, Etna and Spectrum Red, also Royale and Violet Bouquet were highly commended. These trials are highly competitive and such awards are indicative of the high value of our giant strain of Verbenas.

ZINNIAS

BODGER'S FAMOUS "GOLD MEDAL" ZINNIAS FOR CUT FLOWERS AND GARDEN SHOW

Few flowers have exhibited greater improvement at the hands of hybridizers than the Zinnias, and their improvement has been matched with a corresponding increase in public favor. For those getting started with Zinnias, it should be emphasized that the nature of the plants demands plenty of warmth. This is explained by the fact they are native to Mexico. This temperature requirement also, of course, applies to their seed germination, which will be a certain failure in a cold, wet soil. The warm end of a Carnation house or, say, a temperature of around 55 to 60 degrees nights will germinate it. In warm climates Zinnias have high florist value. By sowing around March 1st, Zinnias can be flowered to perfection during May in a Carnation house temperature. By sowing outdoors as late as August 1st, in well-enriched soil and protected with water, they can be had in fine shape right up to frost. To bring out their wonderful colors calls for long sunny days. For this reason they are not profitable as a mid-winter greenhouse crop. Don't overlook the margin in growing Zinnia seedlings for home gardeners. They are liable to become drawn and hardened in pots—better and more easily grown by broadcasting in an open bed.

DAHLIA-FLOWERED CLASS

Generally accepted as the largest and finest of the Giants. They improve the Giant Mammoth in being more incurved and rounded, though not entirely true to this type.

Canary Bird. A rich primrose-yellow.

Crimson Monarch. Large crimson-red.

Dream. A fine deep lavender.

Eldorado. Salmon-apricot.

Exquisite. Fairly deep rose. Valuable for cutting.

Golden Dawn. Golden yellow, dark center.

Golden State. Rich orange-yellow.

Illumination. Deep rose-pink.

Luminosa. Bright deep pink with a suffusion of salmon.

Meteor. Clear deep rose.

Old Gold. Deep and lighter shades of old gold.

GIANT MAMMOTH TYPE

Size and general effect of this class closely approaches the Dahlia-flowered, the difference being in a flat or imbricated placement of the petals. A very popular class of Giant Zinnias.

Brightness. Bright deep rose.

Cerise Queen. Choice cerise-rose.

Daffodil. Bright canary yellow resembling Narcissus King Alfred in color. Very fine.

Enchantress. Light rose, deep rose center.

Golden Queen. Same color as Golden Dawn.

Grenadier. Same color as Dahlia-flowered Crimson Monarch.

Lavender Queen. Same as Dream in the Dahlia-flowered class.

Miss Willmott. Medium light pink, nice soft shade.

Orange King. Similar in color to our Ball Orange Calendula.

Orange Queen. Golden orange.

Purity. A very clean white.

Rose Queen. Bright rose, deeper and brighter than Brightness.

Salmon Queen. Salmon rose.

Scarlet Queen. Best real scarlet in this group.

Violet Queen. Same color as Purple Prince in Dahlia-flowered.

LILLIPUT OR POMPON CLASS

Have obtained the greatest favor for cut flowers—especially the variety "Salmon Gem." They fit in extremely well for small vase decoration and cut flower work generally. Flowers about size of a large button type Pompon Mum. Highly effective for cut flower work, especially nice when the stems are lengthened under glass or cloth houses.

Sanford's Giant Strain. A new giant strain with blooms measuring up to 5 inches in diameter, carried on stems 2 feet long. Contains many lovely colors. Tr. Pkt.....25c ¼ oz.....65c Oz.....\$2.00

The Empress. Truly queen of the Iceland family. Distinct from all other strains, it is remarkable, first, for flower form—large, full, well formed flowers, with broad overlapping petals deeply fluted or wrinkled, giving an effect almost of doubleness, an illusion which is most delightful. Secondly, the color range is unique lovely shades of salmon rose and creamy pinks never before seen in Nudicaule Poppies, fascinating tones to intrigue the imagination. The flowers are carried on good strong stems, which make them fine for cutting.

Tr. Pkt.....	25c	Oz.....	\$2.00
--------------	-----	---------	--------

The Emperor. Without a doubt the best orange Iceland Poppy available, the same type as The Empress, with extremely large fluted petaled flowers, many with an extra row of petals. The color is remarkably true, the same shade as our El Monte, deep tangerine orange, but the flowers are larger, and are borne on very long strong stems. We highly recommend The Emperor. Tr. Pkt.....25c Oz.....\$2.00

Red Cardinal. The closest approach to that much-sought-after color in an Iceland Poppy, crimson scarlet. This novelty is as large-flowered as other Nudicaule sorts, and its intensity of color makes it a welcome addition to Iceland Poppies. Tr. Pkt.....25c ½ oz.....80c

A. B. C. "SUPREME" QUALITY LAWN SEED

ONE MIXTURE ONLY - THE CHOICEST

A. B. C. "SUPREME" QUALITY MIXED LAWN GRASS SEED is just what the name implies. You will, we believe, find this a profitable side line to sell to your customers (especially those of your clientele who have been imposed upon with "chaff mixtures." Put up in attractive cloth bags printed green; one-, two-, three-, five-, ten-, fifteen- and twenty-five-pound bags. Many of our customers find this a ready seller as well as to use for their own application.

Advantages of Sowing Mixed Grass Seeds

It is a well-known fact that a well-balanced combination of grasses will give better results than a separate variety; furthermore, various grasses in mixture will help crowd out weeds; again, a separate variety of seed will fail to thrive on a certain soil, whereas a combination of desirable kinds will give very satisfactory results.

The merchandising of A. B. C. "SUPREME" QUALITY LAWN GRASS SEED will not only allow you to realize a neat profit but as well enhance your reputation as a "QUALITY SUPPLIER."

Tomato "Diener's Ventura"

TOMATO "DIENER'S VENTURA"

(Blight-Resisting)

"Ventura" is the most perfect tomato produced so far; it is very early. The fruit is as smooth as an apple, having a weight of four to eight ounces. Its flesh is of a fine tomato color and is very solid when ripe, so much so that it keeps solid for several weeks without spoiling or rotting, being immune to Fungi. It can be shipped in a ripe condition to very long distances. "Ventura" has a very delicious taste, it being a seedling of the Diener tomato which is known for its wonderful flavor when canned. It is extremely free bearing. We supply the true strain.

MISCELLANEOUS BULBS FOR SPRING

Double Flowered Tuberous Rooted Begonia

GLOXINIAS

Ready in January

Few flowers can surpass the large tubular blooms of Gloxinia for richness and variety of coloring. They make a gorgeous display during the summer and early fall months, and as a pot plant are unexcelled.

GLOXINIA CULTURE

Gloxinias are fit companions for the tuberous rooted Begonias and the fancy leaved Caladiums. Their richly colored flowers are most outstanding. Start the tubers in 4-inch pots in a mixture of leaf mold, sand and a little well-rotted cow manure with good bottom heat. Keep shaded and as the leaves appear, be careful with the watering. You cannot do it with the hose, so make use of the old-fashioned way, the watering can, and go over each plant carefully, examine every one and don't apply water unless it is needed, on the other hand, they suffer every bit as much if they don't get water when ready for it, for they want a moist soil. Keep the leaves dry. To get them moist on a hot day early in the morning doesn't hurt, but they soon go if you wet them every time you water the plants. They want most of all a little shade, but if you overdo it you may obtain foliage but no flowers.

TUBEROSES

Our strain of "Pearl" is the true, large-flowered type, far superior to the old variety. Bulbs are clean and properly graded in sizes offered.

BEGONIAS

TUBEROUS ROOTED BEGONIAS

Large Flowering Type

With its bright colors, richness of foliage and easy culture it has become a favorite with the public in gardens and homes.

EMPLACEMENT. The begonia prefers partial shade and not too warm a place where they will give best results specially in wet summers. For the cultivation in greenhouses, shade is necessary.

CULTIVATION. Forcing can be started in February, March or April, depending on the time they should be in flower. The bulbs are placed in boxes, on light porous soil close together, and then covered with earth to a depth of one inch above the bulb. The earth should be kept just moist, too much water will rot the bulbs.

When the plants begin to develop they are placed in pots.

PLANTING OUTSIDE. In May-June (according to climate) they can be planted outside, preferable in loose soil, and shaded for some days after planting. The distance between the plants should be about 8 inches. A teaspoonful of ammonium phosphate around each plant added in July will stimulate growth and flowers.

"Supreme" Quality Gladiolus Bulbs

For stock that incorporates the required vitality to produce real results, A. B. C. "Supreme" Quality Gladiolus Bulbs are recommended to the grower. With a total output running into the millions of bulbs produced exclusively for bulb harvest only from young corms, we are ready to meet the requirements of growers who desire high quality at a fair price.

Grown Under Close Supervision

Bulbs furnished by us are produced in Northern Indiana and Illinois in sandy loam ideal for their culture and are thoroughly cured before shipping. Our growers hold Agricultural Inspection Certificates that assures you the bulbs are free from thrips and other diseases.

A. B. C. "SUPREME" QUALITY GLADIOLUS BULBS

In common with numerous horticultural subjects, the crop of Gladiolus bulbs produced in the northern country, where this family qualifies to best advantage, has developed into a comparatively short volume of many of the most prominent cutflower varieties. We believe, therefore, it will be to the interest of buyers of this line to anticipate their needs as far in advance as possible. Our extensive cultures of Gladiolus, carried on exclusively for corm production, (not cut-flowers) insures the buyer that quality, needed for worth while results.

PICARDY

Picardy has proved to be one of the most outstanding cut flower Gladiolus introduced in the past decade and this very worthwhile variety has created no end of unusually favorable comment from the trade and public as well.

IMPORTANT NOTE "The Control of Gladiolus Thrips"

Notwithstanding that a grower may start his cultures with perfectly healthy bulbs (corms) thrips may develop in his plantings by invasion of the pest introduced from untreated corms planted in the vicinity, and consequently spraying with "Tartar Emetic" becomes necessary. In this connection we supply, free of charge, copy of circular containing information suggested by the Bureau of Entomology, Washington, D. C., which fully covers the application of above.

The "High Light" of New Hydrangeas

"merritt's beauty"

(PATENT APPLIED FOR)

Early Carmine Red

Joseph S. Merritt, the introducer of this exceptional new variety, says of it: "In our many years of experience in Hydrangea culture, I have never become so enthused over any new variety as the advent of **"merritt's beauty."**

Our opinion of this highly valuable addition is so keen that we have provided over 10,000 stock plants, and with a desire for the freest distribution are offering same at prices within the reach of every grower.

Don't fail to include **"merritt's beauty"** in your Hydrangea requisition. It will, we believe, create a sensation throughout the trade when generally known.

IMPORTANCE OF EARLY ORDERS

As is well known, Hydrangeas in the "better varieties" have become a most important adjunct to the florist business and we suggest early orders for delivery fall 1942, thus enabling buyers to secure desired varieties and quality stock, which, we might say, is not always available when delivery times comes around.

POINSETTIAS
"The Better Varieties"
(Spring, 1942, Delivery)

Stock Plants of "Supreme" Quality

The Poinsettia now holds the same place in the Floral Kingdom at Christmas Time as does the Lily at Easter Time.

Poinsettia Stock Plant Prices for 1942

New Poinsettia "**Christmas Red Ecke**," a sport of the Mrs. Paul Ecke variety, discovered at Nauman's Greenhouses. This sport has a color similar to the Christmas Red variety. More attractive than the Mrs. Paul Ecke variety and will retain its color even if forced at high temperature. Field Grown Stock Plants, **\$25, \$50, \$75, and \$100** per 100.

Variegated Ruth Ecke (Plant Patent No. 336) and **New Ecke White**. Small One Year Old Field Grown Plants, **\$50** per 100. Bench Grown, **\$15** per 100. Limited amount available.

Mrs. Paul Ecke, Oak Leaf, Ruth Ecke, Star of Werder (a recent European importation. This is a sport of "Mrs. Paul Ecke" which is inclined to grow taller! Retains its foliage), **Double Henrietta Ecke, Barbara Ecke, St. Louis, Early White, Improved Late White, Cathryn Reed** (variegated foliage sport of "St. Louis"), **Pink, Hollywood, and True Red**. Field Grown Plants at **\$15, \$25, \$35, and \$50** per 100. Bench Grown, **\$7.50 and \$10** per 100.

The above prices are F. O. B. Eastern cities, care of Railway Express Agency on orders placed before March 15th.

Chrysanthemums A. B. C. SELECTED ROOTED CUTTINGS

To Your Advantage

More growers each year are discovering the economy of discarding their Mum stock after the blooming season and starting with new cuttings produced by a specialist in the Spring. The cuttings can be received in the right stage for planting when wanted and every cutting is strong and uniform. Valuable time and room can be devoted to bedding or other stock instead of being taken by the mum stock and rooting the cuttings. Undesirable varieties can be replaced the following year at no extra cost or time spent in building up stock. Last and most important the cuttings will be free of all insects and diseases that so often take the profit from the crop.

SHADED CHRYSANTHEMUMS

Each year we are finding varieties that respond better to black cloth shade for earlier flowering and we supply a special circular in this connection. Copy mailed free.

Details With Regard to Discounts on Chrysanthemum Rooted Cuttings

SPECIAL EARLY ORDER DISCOUNT. When an order is placed two months, or more, in advance of delivery date, a discount of 5% is allowed, **provided delivery date is April 1st or later.** Be sure to show on your order, date cuttings are wanted. **SPECIAL NOTE:** It may happen that circumstances will allow of our making shipment of these "EARLY ORDERS" previous to April 1st and in such event we will be agreeable to allow the special 5% discount as indicated, however, please advise when ordering if such delivery will be agreeable to you.

Special Discounts for Large Orders: The following discounts, for quantities given, will apply on orders placed **at one time** for the quantity on which discount is taken.

- 5% discount for an order of 10,000
- 7½% discount for an order of 25,000
- 10% discount for an order of 50,000

Please note accompanying schedule showing rates per 100 and corresponding rates per 10. **We do not supply less than 10 of any variety,** except first year Novelties.

Rate per 100	Rate per 10	Rate per 100	Rate per 10
\$3.25	\$0.50	\$ 8.00	\$1.50
4.00	.50	12.00	2.00
6.00	1.00	15.00	2.50
7.00	1.25		

PLEASE NOTE: In figuring your order, please note that ten cuttings are billed at the ten rate; 15 or 20 also at the ten rate; 25 cuttings at the hundred rate; 250 cuttings or more, of one variety, at the thousand rate. **Please note this carefully.** Also, if your order should total 900 cuttings (for example: 100 each of 9 varieties at \$3.25, total \$29.25, while if 1000 are ordered, the thousand rate would apply at \$30.00). This point should be watched in figuring your order so that you may have advantage of the thousand rate on the entire order. Thus, you will note, 1000 cuttings can be purchased for just a little more at the thousand rate, than 900 cuttings figured at the hundred rate. **Watch this.**

Because of the perishable nature of Mum Cuttings, we do not send them C. O. D. but when necessary to do so, we request that 50% of the amount be enclosed with your order.

Shipping Information: All our stock is propagated at Barberton, Ohio, from where it is shipped by Express Collect. We do not advocate shipping chrysanthemum cuttings via parcel post.

"PANOCIO" Gries Introduction

"Panocio"

PLEASE NOTE: This variety is not subject to our usual discount plan.

"ORANGE BELLE" De Petris Introduction

Small-flowered Pompon with good form and substance. Color reddish orange rust. Very free growing habit with small but very persistent foliage. Good spray formation on wiry stems which attain a good length. This variety is outstanding in growth and the attractiveness of its clean stems and foliage. We believe this will prove a profitable variety for the grower. Matures in late November and early December.

Prices for Rooted Cuttings—
\$2.50 per 10 \$15.00 per 100 \$125.00 per 1000

"PENROD" De Petris Introduction

Medium-sized Pernet yellow. Very fine incurved form similar to the old variety Bonnafon. Possesses good substance, giving the variety good keeping as well as good shipping qualities. A free and easy grower with good stem and foliage. Will produce three blooms per plant with remarkable uniformity. A very attractive looking variety that should be useful to growers desiring moderate size together with excellent form and good substance. Matures November 10th but can be easily held for a week later.

"Penrod"

Prices for Rooted Cuttings—
\$2.50 per 10
\$15.00 per 100
\$125.00 per 1000

This new and unusually dainty little Pompon is distinctly different. The color combination of rich maroon and gold is produced by the front of the petals being maroon and the back gold. Flowers turn lighter as they mature. Each little petal is serrated at the ends, giving a feathery appearance. The plant is a good producer and is suitable for cutting and pot plants. Their fine keeping qualities combined with a midseason blooming period, make it a real new introduction.

"CAMBRIA" De Petris Introduction

"Cambria"

A free-growing commercial variety of average size. Form very closely incurved. Color, intense golden bronze with metallic sheen. Strong, wiry stem and small foliage which seems to fill out and stiffer as the flowers mature. It is very easy to grow and quite resistant to disease. Produces two blooms to the plant very uniformly. Blooms possess excellent substance and ship extremely well. An excellent and profitable variety for both wholesale and retail grower. Matures October 25th.

Prices for Rooted Cuttings—
\$2.50 per 10 \$15.00 per 100 \$125.00 per 1000

"RED BRISTOLITE" Yoder Brothers Introduction

A good red sport from Bristolite. Red Bristolite is better as a red than Bristolite is as a bronze. The size, form and substance are excellent. Growth is sparse but persistent. It must be planted close to secure production. Use soft cuttings, clean rich soil; preferably ground beds. Pinch once about July 25th. Plant 5x8 inches; grow two stems. Matures November 25th.

Prices for Rooted Cuttings—
\$2.50 per 10 \$15.00 per 100 \$125.00 per 1000

"EUROPA" De Petris Introduction

An intense cardinal red single of outstanding brilliance and exceptional substance. It may be grown either as a single disbud or as a disbudded spray. The color improves any existing red single. A very brilliant red on the inside of the petal and a gold on the reverse. Europa might be said to mark an epoch in red singles. Its growth habit is medium in vegetativeness. It is fairly easy to grow. The spray formation is stiff and rigid. It must be carefully spaced, carefully pruned and accurately disbudded. We believe it will well repay any man who will give it this kind of cultural treatment. Matures November 5th.

"SONATA"

Yoder Brothers Introduction

A very brilliant orange bronze single. The flower has a starlike appearance that enhances the beauty of any design, basket or bowl into which it is placed. The color is brilliant to the last; its keeping qualities are unusually good. Its growth habit is decidedly vegetative. It is a very easy doer, a heavy producer and it is very popular with the retail trade. Plant early on raised benches; last pinch August 1st. Matures December 5th.

"ROSALIND"

Yoder Brothers Introduction

A pink single that might be described as a pink Yukon. The color is a clean medium pink. The growth habit is excellent; a very free grower; medium sized stem and foliage; no tendency to blindness; it flowers at a time of the year when pink is scarce. It appears to do almost equally well under either ground bed or raised bench environment. Matures December 20th.

Prices for Rooted Cuttings—

\$2.50 per 10

\$15.00 per 100

\$125.00 per 1000

**"Sonata"**

A rich red Anemone of large size and after the style of Crimson Glow. It improves that variety in every respect. The growth habit somewhat resembles that of Valencia except that it is not so vegetative. The stems are stiff and straight with the flower held rigidly and erect. The form is excellent, color is very bright and vivid. For disbudded sprays plant 7x8 in.; pinch July 25th; grow two stems; three flowers per stem. As a single disbud, plant 7x8 in., last pinch August 5th; grow three stems. Matures December 5th.

An ivory Pompon of unusual size and substance that blooms the same time as Yuletide, Cordova and Silver Star. A strong, persistent grower possessing a rigid and well spread spray. The growth habit is superior to any worthwhile variety in its color class and blooming season. The flower is large and of an attractive form. It should be the answer to the grower who demands a white or cream Pompon for early December that will provide him with quality, production and reliability. Matures December 5th.

Baur-Steinkamp "Mum" Novelties for 1942**LARGE FLOWERING VARIETIES**

EARLY OCTOBER. In size and color about the same as October Rose but blooms October 4th. Medium sized foliage and fine stem. Grows five feet from June planting. A boon to the grower who does not grow Mums under shade. Take terminal bud for best color.

MONGOL. Might be styled an early Detroit News which it resembles except that the blooms build higher in the center. A fine golden bronze coming into flower by October 20th. Grows five feet from June planting. Good stem and foliage. Take terminal bud.

GLORIA. A fine late commercial yellow, blooming for Thanksgiving cutting, November 25th. Incurved bloom of large size and good substance. Good stem and foliage. Grows four feet from June planting. Take terminal bud.

DECEMBER WHITE. Should prove valuable to the grower who wants fine blooms in December without having to use artificial light for retarding blooming. The bloom is always clear white, large size, incurved and carried on strong stems. Grows five feet from July 1st planting. Take terminal bud.

POMPONS

CHO CHO. Large button type Pompon. Fine even shade of lavender-pink flower the size of Pink Dot. Medium height. Blooms October 9th.

YELLOW-HAMMER. Bright golden yellow Pompon to come in ahead of Golden Spray and Goldfinch. Blooms are same size as Pink Dot. Medium height and produces heavily. Good for shading.

FAWN. Beautiful clear shade of daybreak pink. Blooms are 2½ inches in diameter and produced in fine sprays. Fine grower and blooms October 20th.

UNEEDA. Late pink of good color and substance, for Thanksgiving cutting, its blooming date being November 25th. Grows to medium height and produces well.

ANEMONE

COLLARETTE. A white Anemone with bright yellow cushion. The blooms are 2¼ inches in diameter. Blooms November 8th and holds well.

SINGLE

AURORA. A late pink single which will prove extremely valuable for cutting along with Garza Supreme. The blooms are three inches in diameter, bright pink with bright yellow disc. Grows four feet tall with strong stems and the yield is very heavy.

HARDY PERENNIAL PLANTS

The following pages contain some of the most desirable Hardy Perennial plants for cut flower production and garden show as well. We are also in position to furnish every worthwhile variety, produced by a specialist who is renowned for quality. Our special complete catalogue of Hardy Perennial Plants ready February 1, 1942. If interested write for a free copy.

ACHILLEA

Milfoil or Yarrow

PERRY'S WHITE. 1 to 2 feet. June to August. A choice variety. Nothing better for cutting. An excellent filler. The whitest of all Achilleas, and an outstanding favorite with florists for summer flowers.

Per 10, 85c; Per 100, \$6.00

ANTHEMIS

TINCTORIA, PERRY'S VARIETY. Nicely formed bushes 15 to 18 inches in height with fern-like foliage covered from June to October with large, well-shaped golden yellow Daisies, nearly 3 inches across. Valuable for cutting.

Per 10, \$1.50; Per 100, \$10.00

AQUILEGIA or COLUMBINE

MRS. SCOTT ELLIOTT HYBRIDS. There is not a better mixture grown in the world. Wonderful colors and color combinations, with very long spurred flowers. Colors range through shades of lavenders, mauves, blues, purples, whites, creams, yellows, pinks, reds, etc.

Per 10, \$1.50; Per 100, \$10.00

ARTEMESIA

Boundlessly useful, either for the border, for spotting in shrub plantings, or, particularly, for filling in floral effects.

SILVER KING. Unquestionably one of the best all around decorative plants. Its bright silver-colored stems and foliage are of great value as a filler for bouquets, sprays, baskets, or all sorts of floral pieces. By cutting and drying the stems it is very valuable in the winter for filler. It is a showy plant in the perennial border or among shrubbery.

2-in. Pots

Per 10, \$1.00; Per 100, \$7.00

HARDY ASTERS

ASTER FRIKARTI, Wonder of Staffa. Lavender-blue flowers from 2 to 2½ inches across, produced from June 1st until the middle of November. Does exceedingly well in light shade and comes to perfection in full sun. A constant rich display of flowers is kept up the entire summer. Flowers are excellent for cutting. 2¼-in. pots.

Per 10, \$2.00; Per 100, \$15.00

STAR OF WARTBURG. Large lilac blue flowers with a striking orange center are produced on 12 to 14-inch stems about the middle of June. A strikingly beautiful plant in the rock garden or in any perennial bed. While very striking in its permanent location, at the same time the flowers can be cut and used in the better types of floral pieces. 2¼-in. pots.

Per 10, \$1.50; Per 100, \$10.00

BEECHWOOD CHARM. Compact growing plants, very freely producing clear deep rosy red flowers which are very useful for cutting and decorating. Grows to a height of 4 feet and flowers from September to frost. It is a very distinct plant in the landscape and also when planted with an assortment of other Hardy Asters.

2¼-in. Pots

Per 10, \$2.00; Per 100, \$15.00

HARDY ASTERS (Continued)

BLUE PLUME. Stately, effective spikes, covered with deep purple, almost double flowers. A very choice variety.

2¼-in. Pots

Per 10, \$2.50; Per 100, \$20.00

HARRINGTON'S PINK. Produces fine silvery rose flowers in clusters, continuously from early September until cut down by frost. It makes a striking show in the garden and florists will find this a valuable cut flower for use in the larger vases and floral arrangements.

2¼-in. Pots

Per 10, \$2.00; Per 100, \$15.00

PALMYRA. Grows to a height of 30 inches, produces very attractive blue flowers in abundance, creating a marvelous showing in garden plantings. It is also desirable for cutting purposes.

2¼-in. Pots

Per 10, \$2.50; Per 100, \$20.00

RED CLOUD. A rare and very fine novelty. Produces pure deep pink flowers in September and October. Height 4 to 5 feet.

2¼-in. Pots

Per 10, \$2.00; Per 100, \$15.00

STAR OF EISENACH. This plant produces an abundance of large, very dark violet-blue flowers with orange centers. Most ideal for cutting.

2¼-in. Pots

Per 10, \$2.50; Per 100, \$20.00

BUDDLEIAS

(See back cover page for colored illustration, description and prices)

CAMPANULA

Persicifolia

PRIDE OF EXMOUTH. This, without question, is one of the most beautiful Campanulas, both for garden showing and for use as cut flowers. It is a very pleasing shade of sky blue with a white tint. The bell-shaped flowers are extra large. They are ideal for use in vases by themselves and also blend perfectly with other flowers.

2¼-in. Pots

Per 10, \$3.00; Per 100, \$25.00

HUMOSA. Grows to a height of 24 to 30 inches and produces large, semi-double blue flowers.

2¼-in. Pots

Per 10, \$2.00; Per 100, \$15.00

BLUE SPIRE. Finest double blue peach-leaf Bellflower. Grows 2 to 3 feet in height and flowers in June and July.

2¼-in. Pots

Per 10, \$2.50; Per 100, \$20.00

SPECIAL NOTE!

All perennial plants listed in these pages are supplied in strong field plants unless otherwise noted.

A. B. C.

CARNATION

SCARLET KING. This, without question, is the most outstanding Hardy Carnation discovered in recent years. It produces large, solid double scarlet flowers on sturdy stems 12 to 14 inches in length. This is the closest resemblance to good quality greenhouse Carnations that we have ever seen. The outstanding value of this plant is that when small 2¼-inch pot plants are planted outdoors in proper planting season in the spring, five to six weeks after planting, the first attractive flowers will appear. Within a very short time, the entire plant is covered with beautiful glowing scarlet flowers, which are most suitable for use in floral pieces. This is also one of the most showy plants in the hardy garden. The plants are exceptionally hardy along the lake regions; the winters do not seem to set them back; they continue to produce heavy crops of flowers for over a period of years. We highly recommend that you make a planting of this most outstanding Hardy Carnation outdoors this spring.

2¼-in. Pots

Per 10, \$2.50; Per 100, \$20.00

CARNATIONS

CRIMSON KING. Produces beautiful double crimson flowers on stems 12 to 14 inches in length. Very desirable for floral arrangements. We have growing in our nurseries an excellent type of this worthy Carnation. If the flowers are cut continuously, our plants will flower practically all summer, thus providing desirable material for your summer requirements.

2-in. Pots

Per 10, \$1.50; Per 100, \$10.00

CENTAUREA

Knapweed

MACROCEPHELA. The flowers are large thistle-like, golden yellow on erect stems. They can easily be worked into almost any floral arrangement and on account of the size of flowers they are very noticeable.

Per 10, \$1.50; Per 100, \$10.00

COREOPSIS

A useful and attractive herbaceous perennial, both for border and cut flowers. They are of easy culture and produce their golden yellow flowers in profusion throughout the summer.

NEW DOUBLE SUNBURST. Here is a Coreopsis which is different, producing striking golden yellow flowers which are actually double and of good size. They attract a great deal of attention and are also elegant cut flowers, noted for their keeping qualities. They grow to a height of 24 to 30 inches.

Per 10, \$1.50; Per 100, \$10.00

DAISY

(*Chrysanthemum Maximum*)

Shasta or Moonpenny

SHASTA DAISY—CHIFFON. A daintily frilled Shasta Daisy which grows about 18 inches tall. The flowers are formed by a double row of narrow petals, frilled and flared at the edges. The flowers, about 3 inches across, with a clear yellow center, are very pleasing and dainty.

2¼-in. Pots

Per 10, \$1.75; Per 100, \$12.00

FLORISTS' FAVORITE. Extra large five-inch flowers with overlapping stiff pure white petals. Blooms in June and July. Height 2½ to 3 feet. A real favorite for florists.

2¼-in. Pots

Per 10, \$2.00; Per 100, \$15.00

MARTIN'S EARLY MEMORIAL DAISY. Large, pure, glistening white flowers on 24-in. stems. Plant on benches in December and January. Forcing time required eight weeks.

Strong forcing clumps,

Per 10, \$1.50; Per 100, \$10.00

SNOWBANK. A very worthy novelty, well described by its name. Comes into full flower in mid-summer. From there on it truly represents a snowbank. Semi-double pure white flowers are produced in abundance. It is a compact grower, height about 18 inches.

Per 10, \$2.50; Per 100, \$20.00

DOUBLE WHITE SWAN. Pure white, double flowers on strong, wiry stems 24 to 30 inches in length, in bloom for Memorial Day. We were informed that this Daisy is also an excellent forcer, producing wonderful flowers under glass. These flowers always command a good price, whether in bloom outdoors for Memorial Day or under glass in the month of March. You will find a planting of these Daisies very profitable.

Per 10, \$1.75; Per 100, \$12.00

DELPHINIUMS

From the appearance of our fields this year we will have for forcing wonderful quality Delphiniums. The improved types of today are far superior. By all means we recommend that you make a nice planting. All our plants will be properly frost cured for immediate planting upon receipt. It is important that they be grown in fairly heavy loamy soil in cool temperature. You will find our prices very reasonable for forcing material.

DELPHINIUMS (Continued)
Giant Pacific Hybrids

This is the most beautiful of the Delphiniums. The stems are wiry, strong enough to resist high winds. Under good conditions, these plants will produce beautifully proportioned spikes 3 to 5 feet in height. The individual flowers are large, 2 to 3 inches in diameter, of delicate shadings and of good form and substance. We strongly recommend the plants both for the bright landscape and for cutting.

EUPHORBIA
Flowering Spurge

COROLLATA. A branchy, tall growing plant with fine stems and foliage, literally covered from June to August with loose umbels of pretty white flowers. Good for cutting in long sprays; and one of the most charming mist flowers to mix with bouquets of larkspur.

Per 10, \$1.50; Per 100, \$10.00

EUPATORIUM
Hardy Ageratum

COELESTINUM. A fine perennial closely resembling the Ageratum, flowers a lavender blue, flowering from August to frost. A fine perennial for florists use. 12 to 14 inches. Good cut flowers.

Per 10, \$1.00; Per 100, \$7.00

FUNKIA UNDULATA
VARIEGATA

Best planted in February and the first part of March. Will develop into very desirable foliage pot plants. We have large quantities of especially prepared clumps for forcing purposes.

Per 10, \$1.50; Per 100, \$10.00

GAILLARDIA

New Everblooming Gaillardia

GOLDEN GODDESS. Here is a real everblooming Gaillardia every florist should have. Grows to a height of about 24 inches, making good bushy plants. Practically all its branches grow full length on which beautiful, golden yellow flowers are produced. If flowers are cut when ready, the plants will continue producing excellent quality blooms with long stems until cut down by frost. The rich, golden yellow color is really very striking in practically all floral work.

2¼-in. Pots

Per 10, \$1.75; Per 100, \$12.50

MAGNIFICENT. Flowers are extra large, measuring 3 to 5 inches in diameter and of such substance that they will stand up well in larger baskets and they are outstanding as a basic flower. Color is a bright golden yellow with a defined mahogany zone; petals are very broad.

NOTE! All perennial plants are supplied in strong field clumps unless noted otherwise

GYPSOPHILA
Baby's Breath

BRISTOL FAIRY. This plant is well known for its true value as a filler in all types of floral work. Due to the unusually heavy demand that we enjoy each year, we propagate exceptionally large quantities. For this fall's sales, as usual, we have excellent quality field grown roots at a reasonable price.

FLAMINGO. It has the same habit of growth and flowering as the well known Bristol Fairy. It is a prolific bloomer; the first flowers, varying from light pink to white appear in June and July. If these are cut, the plants will produce a second crop the first part of September and due to the cooler nights at that time, from thereon the flowers come a very good shade of lilac pink. These are very neat in appearance and when used in floral pieces they really create a very high class effect.

DOUBLE COLORADO. Produces double, pure white flowers on 18 to 24-in. stems. Our propagations are from the genuine Colorado roots and will produce the same type of Gypsophila flowers that you purchase from the wholesale cut flower houses in dry form throughout the winter months. A planting of these is a good investment. It will provide for you the genuine Colorado Gypsophila flowers for many years to come. You can use these freshly cut or you may harvest your fully matured flowers and dry them for winter use.

REPENS BODGERI. Grows to a height of 12 inches with a spread of 18 to 24 inches. Produces double white flowers. It is an ever-bloomer, from early spring until late fall, filling in the gap between crops of Bristol Fairy. We have for shipment this fall extra fine quality field grown roots.

2-in. Pots

Per 10, \$1.25; Per 100, \$8.00

ROSY VEIL. In character it is in every way like the very popular Bodgeri, except that this variety comes out a very pretty pronounced pink, making a wonderful companion for the preceding. Rosy Veil is very valuable in floral work for very often this shade of pink will add the finishing touch to set off a design in beautiful style. Furthermore, by having both Bodgeri and Rosy Veil as fillers, you can create altogether different effects.

HEUCHERA

Coral Bells

The recent recognition and publicity which has been accorded the Heucheras by gardening publications and trade papers alike, has greatly increased the demand for them. This spring will see them attaining the position which their novelty and beauty makes them deserve. We have kept pace with all the introductions in this line and we present below a complete list of all that is really good. Don't fail to note the reasonable prices.

RAIN OF FIRE (Pluie De Feu). Compact growing variety, producing bright red flowers. Due to its durability this variety is one of the outstanding good reds.

Per 10, \$2.00; Per 100, \$15.00

MATIN BELLS. A new carmine rose. Early, very free flowering type. Grows 15 inches tall. Blooms from June to August.

LIATRIS

Blazing Star or Gayfeather

PYCNOSTACHYA. A perfectly hardy perennial of luxuriant growth, doing well in any kind of soil, poor or rich, moist or dry, producing richly colored purple flowers on stout stalks 6 feet high in graceful spikes one foot long. In bloom during July and August. First rate cut flowers.

Per 10, \$1.00; Per 100, \$7.00

SCARIOSA. (Late Type.) This is a much showier form than is usually sent out for this plant. It has large, showy purple heads and flowers much later than the others. A very imposing form. September. 4 to 5 feet.

Per 10, \$1.50; Per 100, \$10.00

SCARIOSA WHITE PEARL. The White Blazing Star. Imposing plants growing 3 to 4 feet with elegant flower spikes thickly covered with lovely fluffy white blooms that reach more than half way down the stems. Blooms in August and September. Fine for cutting.

2¼-in. Pots

Per 10, \$2.00; Per 100, \$15.00

SPICATA. Grows to a height of 24 to 30 inches, producing reddish violet flowers on spikes from 12 to 15 inches in length. It flowers about three weeks earlier than any other Liatris. It is very attractive when used in arrangements with Delphinium, Belladonna or other seasonable flowers.

Per 10, \$1.00; Per 100, \$7.00

SCARIOSA, SEPTEMBER GLORY. (New.) A giant 5-ft. spike solidly covered with purple flowers from top to bottom. The flowers, unlike the common variety, come into bloom all at the same time, creating a marvelous effect. A splendid improvement over the old variety. Late flowering, September.

LYTHRUM

Purple Loosestrife

LADY SACKVILLE. A beautiful new variety, brilliant rosy-pink flowers. An excellent cut flower during June and July, also a fine plant for the perennial border, attaining a height of 3 feet; grows well in shade or sun.

Per 10, \$2.00; Per 100, \$15.00

THE BEACON. A very showy variety, having neat, long-lasting spikes of large, clear, deep carmine red flowers, followed with side spikes almost to the ground. Very versatile, will grow in very wet spots and also in dry spots and in full sun or semi-shade. Height 3½ feet. Blooms from July to September.

Per 10, \$2.50; Per 100, \$20.00

OENOTHERA

Evening Primrose

Elegant for a sunny position in the border or in the rockery, blooming all summer.

ILLUMINATION. Large, deep golden yellow flowers are produced freely from early June to frost. The healthy leathery foliage is reddish brown, harmonizing beautifully with the blooms.

2-in. Pots

Per 10, \$2.50; Per 100, \$20.00

PENTSTEMON

Beard-Tongue

Few genera among the popular hardy perennials afford a greater number that are so attractive. Their natural gracefulness, variety of colors, and great abundance of flowers make them useful in many places. Though hardy as a rule, too much frost with an excess of moisture in winter seems to be fatal to most of this genus. The flowers are tubular and like Foxglove in shape.

GARNET. A new hardy Pentstemon with bright scarlet flowers, gracefully placed on stems 12 to 18 inches tall. Each plant produces from six to twelve spikes through the flowering season. Blooms from June until stopped by frost. Its opportunities are unlimited as a profit maker.

Special Offer: 2¼" Pots

Per 10, \$1.50; Per 100, \$10.00

STATICE (Continued)

LATIFOLIA. (Sea Lavender). The fine purplish blue flowers are very attractive when used as a filler in medium sized vases. These plants produce an abundance of flowers during the months of July and August. If cut and dried they can be kept for a long time in good condition. Also a valuable plant for the border or rockery.

Per 10, \$1.00; Per 100, \$7.00

THALICTRUM

Meadow Rue

Very graceful, pretty flowered plants with fine cut foliage; great favorites for planting in the hardy border. They are of easy cultivation in sun or shade.

ADIANTIFOLIUM. A beautiful variety, with foliage like the Maidenhair Fern and miniature white flowers in June, grows about 2 feet high.

Per 10, \$1.50; Per 100, \$10.00

THERMOPSIS

CAROLINIANA. A lovely lupine-like plant with rich green foliage growing about 2 feet high. In June and July, yellow pea-like flowers are produced in racemes 6 to 12 inches long. The general appearance is that of a yellow lupine.

Per 10, \$2.00; Per 100, \$15.00

TRITOMA

Red Hot Poker

PFITZERI. The rich orange flowers are always in big demand on the cut flower markets. We have never known of any surplus of real good Tritomas. If grown in fairly rich soil, a plant will produce several first class quality flowers. Tritomas should be included in every planting of summer cut flowers.

Per 10, \$1.50; Per 100, \$10.00

VERONICA

A very interesting family of plants that form excellent subjects for the hardy border and rockery. They will thrive in a rich, well-drained soil in an open situation in full sun.

BLUE SPIRE. A worthy and outstanding novelty. Grows to a height of about 2 feet, producing lovely deep blue spikes of flowers above lively green foliage. It thrives well in almost any type of soil and the flowers are desirable for cutting.

Peonies

Years ago it was recommended that for best results Peonies should always be planted in the Fall. For the past several years, however, large quantities have been planted with equally good results during the Spring planting season. The varieties listed below are all good cut flower sorts, of a type that can be planted during the early Spring months and they will produce first-class results.

ALEXANDER DUMAS. A brilliant pink, interspersed with salmon, white and chamois. Early, very profuse bloomer, and very rigid plant. One of the greatest bloomers of all.

\$2.00 per 10 \$16.00 per 100

FELIX CROUSSE. Large, typical bomb-type flower of clear, brilliant red, coming in late mid-season. The guard petals are prominent, surrounding a large, globular center of even coloring. It is a strong, vigorous plant of spreading habit.

\$2.00 per 10 \$15.00 per 100

KARL ROSENFELD. A better Peony and a better quality of red than any of the older red sorts; pure, rich, intense crimson of half-rose type. It makes and remains a splendid full rounded flower of excellent substance; equally valuable as cut flowers or garden show.

\$2.00 per 10 \$15.00 per 100

LA PERLE. Very large flowers, compact rose type. Outer petals are delicate lilac white enclosing a globular center of soft violet rose, wide petals.

\$2.00 per 10 \$16.00 per 100

MME. DUCEL. Pink of medium shade with silvery reflex. Bomb-type, resembling the famous Mons Jules Elie. Very desirable. Strong grower, medium height.

\$2.00 per 10 \$15.00 per 100

MONS JULES ELIE. Bomb-type; early midseason. King of all Peonies. Color an ideal glossy lilac-pink, shading to a deeper rose at the base, the entire flower overlaid with a sheen of silver.

\$2.00 per 10 \$16.00 per 100

PRESIDENT ROOSEVELT. Semi-rose type; mid-season. A variety purchased in England under number and named in Holland for our President. It is deep, rich, brilliant red in color, different from any red we know, and a grand Peony.

\$2.00 per 10 \$18.00 per 100

PRINCESS BEATRICE. Large, compact high crown. Guards and crown light violet-rose, collar cream-white, center flecked crimson. Fragrant. Strong vigorous grower, medium height, very free bloomer. Early mid-season. Extra good tri-color.

\$2.00 per 10 \$15.00 per 100

SARAH BERNHARDT. Semi-rose type. Midseason. Appleblossom pink, with each petal silver tipped.

\$2.00 per 10 \$15.00 per 100

UMBELLATA ROSEA. Rose type; very early. Large flower, guards laid with delicate salmon and La France pink tints. Exquisitely beautiful in form and color.

\$2.00 per 10 \$15.00 per 100

The Sensational New Buddleia

“ROYAL RED”

PATENT APPLIED FOR

In presenting Buddleia Royal Red we believe we are introducing a new hardy plant that will be the sensation of the plant world for years to come. Royal Red represents eight years of intensive breeding work, culminating in the first truly red Butterfly Bush.

As a hardy summer cut flower plant and as an ornamental lawn shrub, Royal Red is unsurpassed in beauty and usefulness. From July until frost the plant produces an abundance of rich dazzling red panicles that attract instant attention.

For the Florist, Royal Red is one of the most useful of all summer flowers—the rich red color is greatly intensified under artificial light and the flowers harmonize well in all floral arrangements. For garden planting, Royal Red is one of the most beautiful hardy

plants that has ever been produced. The plant is hardy, grows four to six feet high and the foliage is deep leathery green. The sturdy young pot plants we offer will flower abundantly the first year. We suggest placing your order for the above at an early date.
